LIVÉ2

A Breakthrough ASSESSMENT & PRACTICE Program that Prepares All Students for Next Generation Assessments

Developed for GRADES 1–8+

After Apple-Picking
by Robert Frost

My long two-pointed ladder’s sticking through a
tree Toward heaven still.
And there’s a barrel that I didn’t fill
Beside it, and there may be two or three

5 Apples I didn’t pick upon some bough.
But I am done with apple-picking now.

Essence of winter sleep is on the right,
The scent of apples: I am drowsing off.
I cannot shake the shimmer from my sight

10 I got from looking through a pane of glass
I skimmed this morning from the water-trough,
And held against the world of hoary grass.

It melted, and I let it fall and break.
But I was well

Lines in the poem create images that tell what the speaker senses and feels. Look at the following lines from the poem. Determine whether the lines refer to senses or feelings by dragging the tiles next to each line from the poem.

“The scent of apples” (line 8)

“I am drowsing off” (line 8)

“the shimmer /.../ I got in looking through a pane of glass” (lines 9-10)

“And I keep hearing /cellar-bin/That rum” (lines 23-24)

“For I have had too much/Of apple-picking” (lines 26-27)
For more than 25 years, Mastery Education—formerly Peoples Education—has developed a unique, trusted partnership with more than 10,000 schools across the nation. We’ve built our reputation by working directly with teachers and researchers, to create the Measuring Up program to provide assessment and practice that enables students to master the skills they need for successful, accurate, and anxiety-free testing.

Now, with further research, educator feedback, and enhanced technology, we are thrilled to offer a more efficient, enjoyable, and dynamic solution…

Prepare to Experience MASTERY

Founded upon TEACHER SUPPORT...

Focused on STUDENT SUCCESS

The NEW innovative assessment and practice solution, expertly designed to offer data-driven instructional support to prepare all students for the Next Generation Assessments.
The Stakes are Higher Than Ever...

WHAT’S THE STRATEGY FOR SUCCESS?

In the age of high-stakes assessments, educators need resources that can evaluate student learning and prepare students for the rigorous expectations of both the standards and the Next Generation Assessments. *Measuring Up Live 2.0* gives students essential practice and assessments designed to reduce anxiety and boost performance.

- Personalized, adaptive, and designed to motivate, engage, and ensure student mastery of standards
- Equipped with actionable data reporting to empower educators and drive instruction
- Customized, formative assessment featuring 55,000+ high-quality items aligned to your state standards
- Designed to prepare students for high-stakes assessments in a low-stakes environment

LOWER THE PRESSURE, INCREASE THE RESULTS!
Measuring Up Live 2.0 is comprised of two separate programs seamlessly integrated into one effective assessment and practice solution, expertly designed to drive instruction and prepare your students for success on the Next Generation Assessments. Here’s how:

1. **Getting Started with Measuring Up Live 2.0**
   Simply upload your student list and create your class roster(s).

2. **Explore the Assessment Item Bank**
   Explore more than 55,000 available test items and start building your assessment library. Customize or choose pre-created assessments, and set parameters before assigning tests to students.

3. **Evaluate Results with Reporting**
   Collect, analyze, and evaluate results with precision reporting tools and filters. Comprehensive reporting allows you to see where your students are struggling most so you can drive more effective instruction.

4. **Two Integrated Programs Deliver Continuous Assessment & Practice**
   Students complete and submit assessments during your designated testing window. The results are compiled and recorded for evaluation.

**FOCUS & PINPOINT ONGOING ASSESSMENT**
Measuring Up Insight is a criterion-referenced assessment platform that can be used for ongoing assessment throughout the year in a variety of ways, including:
- **Diagnostic**
- **Formative**
- **Benchmarking**
- **Summative**
- **Progress-Monitoring**

**ENGAGE & PROVIDE TARGETED PRACTICE**
Measuring Up MyQuest is a standards-based practice program designed to meet students at their level with content that adapts based on their performance.
- **Adaptive**
- **Formative**
- **Personalized**
- **Motivational**
- **Prescribed**
A SINGLE MANAGEMENT SYSTEM TO DRIVE INSTRUCTION

The Educator Dashboard features summaries of recent activities for schools or classes, opportunities for professional learning, and important data snapshots for individual classes across both Insight and MyQuest.

With Measuring Up Live 2.0, educators receive unparalleled access to student performance and program implementation data. The ALL-NEW Educator Dashboard provides a single management system where teachers and leaders can run reports, create and assign assessments and practice, and receive ongoing professional learning support.
Educators can assign specific point values to individual items, place questions in a specific order, or randomize order if a student is going to be taking the assessment online.

Filters allow educators to choose questions based on standard, item type, reading passage, and cognitive level.

ASSIGN TARGETED ASSESSMENTS
Your students can be assigned assessments by class, group, or individual, and have the flexibility to work at their own pace based on the timeframe set by their administrator or teacher.
AUTHENTIC PRACTICE BUILDS
STUDENT CONFIDENCE

Measuring Up Insight includes an assessment library, complete with pre-created assessments aligned to the rigorous Next Generation Assessments. You can also build upon your library by customizing or creating your own assessments.

AUTHENTIC ASSESSMENTS
Educators can assign or create assessments that prepare students for state or national standards. Students take those assessments in an actual test environment.

PROVIDE STUDENTS WITH A TECH-ENHANCED ASSESSMENT EXPERIENCE
By allowing your students to practice with the technology-enhanced item types that they will experience on their high-stakes assessments—they will go into their exam with the confidence they need to focus on the content, not the technology of the test.

When assigning an assessment, you can determine testing windows, activate testing tools, and determine if students will receive instructional feedback.

INSIGHT ASSESSMENT LIBRARY
From the assessment library, educators can save, sort, and organize all pre-created or custom assessments.
GET EVEN MORE ACCESS TO ACTIONABLE DATA

With Measuring Up Live 2.0 analytics, you can access real-time, actionable data to drive standards-based instruction, group students, and connect with families. Clear, concise reporting allows all stakeholders to have a pulse on student performance at the standard, sub-learning, and specific question level.

MEASURE PERFORMANCE

The all-new Growth Report shows results over time in an individual skill category. This report can be created using specific standards, from specific tests.

TEST ITEM ANALYSIS

Educators can easily check the difficulty level of each test or item and will be able to understand how each student performs through detailed analysis of their responses.

MY PERSONAL PRESCRIPTIVE PATH® (P3)

From the My Personal Prescriptive Path, your students can review their assessment results, embark on a personalized quest through standards-based MyQuest, or view which Measuring Up worktext lessons will provide additional instruction and practice for that skill.
Teachers have the ability to see how students level up or down within the program. They can also analyze what challenges students may be having by examining their individual responses.

**INSIGHT PRESCRIBED**
Students are prescribed individualized practice based on their Insight assessment results.

**TEACHER ASSIGNED**
Teachers can assign practice by class, group, or individual student.

**OPEN QUESTING**
When activated by the teacher, students can decide their own standards-based practice.

Students embark on a standards-based quest that will pinpoint their individual knowledge—with a program that levels up or down based on their responses. With three ways to practice, students can be prescribed or assigned targeted review or can drive their own learning.

**TARGET THE NEEDS OF EVERY STUDENT**
Measuring Up MyQuest features adaptive practice designed to help you target instruction and meet all students at their exact proficiency level. Educators receive detailed, student-specific information that helps them understand where each student is tracking.

**CREATE & CUSTOMIZE**
Teachers have the ability to see how students level up or down within the program. They can also analyze what challenges students may be having by examining their individual responses.
Measuring Up Live 2.0 provides students with a dashboard that highlights the skills they need to focus on and assignments they need to complete. When students can see their achievements and witness their own success firsthand, they are motivated to take ownership of their personal path to mastery.
Providing your students with access to their own performance data and insight into their individual learning goals lets them become active partners in the learning process. Students can create customizable avatars, helping to further personalize learning, build accountability, and in their own unique way personify success.

Students get to personalize their very own avatar within a built-in rewards system. Children have the ability to earn tokens, medals, and badges, receive teacher-generated certificates, and play games in MyQuest.

Through the My Progress tab, students can view the number of standards they’ve mastered, as well as other encouraging results, in real-time.
Measuring Up Live 2.0 is a flexible fit for all core instruction!

Measuring Up Live 2.0 is an online, supplemental program that allows you to track your students' progress towards standards mastery and provide them with an authentic testing experience to practice for their Next Generation Assessments.

Measuring Up Live 2.0 can be used for:

- Formative and Summative Assessment
- Curriculum-Based Assessments
- Ongoing Standards Practice
- Before- and After-School Programs
- Summer School
- Homework

Measuring Up Live 2.0 is an online, supplemental program that allows you to track your students' progress towards standards mastery and provide them with an authentic testing experience to practice for their Next Generation Assessments.
