A BLENDED SOLUTION That Supplements Any Classroom Curriculum

Mastery Education's Measuring Up suite of print and digital programs includes everything you need to maximize student success on the PARCC with ongoing assessment, personalized practice, and targeted instruction. You will be able to pinpoint the exact skill(s) your students need to practice and master while building their confidence for high-stakes testing.

DIAGNOSE

PRACTICE

INSTRUCT

Focused on the most tested standards, Measuring Up Core Success makes mastering those standards accessible for all students. Available for English Language Arts and Mathematics in Grades 3–8. Measuring Up Core Success lessons are directly aligned to Measuring Up Live assessment and practice.

Available for purchase separately.

For more information, call 1.800.822.1080 or visit masteryeducation.com
For more than 25 years, Mastery Education—formerly Peoples Education—has developed a unique, trusted partnership with more than 10,000 schools across the nation.

We’ve built our reputation by working directly with teachers and researchers, to create the Measuring Up program to provide assessment and practice that enables students to master the skills they need for successful, accurate, and anxiety-free testing.

Now, with further research, educator feedback, and enhanced technology, we are thrilled to offer a more efficient, enjoyable, and dynamic solution...

Prepare to Experience MASTERY

The NEW innovative assessment and practice solution, expertly designed to offer data-driven instructional support to prepare all students for the PARCC assessments.

Founded upon TEACHER SUPPORT...

Focused on STUDENT SUCCESS
The Stakes are Higher Than Ever... WHAT’S THE STRATEGY FOR SUCCESS?

In the age of high-stakes assessments, educators need resources that can evaluate student learning and prepare students for the rigorous expectations of both the standards and the PARCC assessments. Measuring Up Live 2.0 gives students essential practice and assessments designed to reduce anxiety and boost performance.

LOWER THE PRESSURE, INCREASE THE RESULTS!

- Personalized, adaptive, and designed to motivate, engage, and ensure student mastery of standards
- Equipped with actionable data reporting to empower educators and drive instruction
- Customized, formative assessment featuring 55,000+ high-quality items aligned to your state standards
- Designed to mirror the PARCC, supporting high-stakes practice in a low-stakes environment

MASTERYEDUCATION.COM 1.800.822.1080
Measuring Up Live 2.0 is comprised of two separate programs seamlessly integrated into one effective assessment and practice solution, expertly designed to drive instruction and prepare your students for success on the PARCC assessments. Here’s how:

1. GETTING STARTED WITH MEASURING UP LIVE 2.0
Simply upload your student list and create your class roster(s).

2. EXPLORE THE ASSESSMENT ITEM BANK
Explore more than 55,000 available test items and start building your assessment library. Customize or choose pre-created assessments, and set parameters before assigning tests to students.

3. EVALUATE RESULTS WITH REPORTING
Collect, analyze, and evaluate results with precision reporting tools and filters. Comprehensive reporting allows you to see where your students are struggling most so you can drive more effective instruction.

4. MASTERY

SEAMLESS INTEGRATION, MAXIMUM RESULTS!

FOCUS & PINPOINT ONGOING ASSESSMENT
Measuring Up Insight is a criterion-referenced assessment platform that can be used for ongoing assessment throughout the year in a variety of ways, including:

- Diagnostic
- Formative
- Benchmarking
- Summative
- Progress-Monitoring

TWO INTEGRATED PROGRAMS DELIVER CONTINUOUS ASSESSMENT & PRACTICE

ENGAGE & PROVIDE TARGETED PRACTICE
Measuring Up MyQuest is a standards-based practice program designed to meet students at their level with content that adapts based on their performance.

- Adaptive
- Personalized
- Prescribed
- Formative
- Motivational
A SINGLE MANAGEMENT SYSTEM TO DRIVE INSTRUCTION

The Educator Dashboard features summaries of recent activities for schools or classes, opportunities for professional learning, and important data snapshots for individual classes across both Insight and MyQuest.

With Measuring Up Live 2.0, educators receive unparalleled access to student performance and program implementation data. The ALL-NEW Educator Dashboard provides a single management system where teachers and leaders can run reports, create and assign assessments and practice, and receive ongoing professional learning support.
Educators can assign specific point values to individual items, place questions in a specific order, or randomize order if a student is going to be taking the assessment online.

Filters allow educators to choose questions based on standard, item type, reading passage, and cognitive level.

Your students can be assigned assessments by class, group, or individual, and have the flexibility to work at their own pace based on the timeframe set by their administrator or teacher.
When assigning an assessment, you can determine testing windows, activate testing tools, and determine if students will receive instructional feedback.

AUTHENTIC PARCC PRACTICE BUILDS STUDENT CONFIDENCE

Measuring Up Insight includes an assessment library, complete with pre-created assessments built to the exact form and function of the PARCC assessments. You can also build upon your library by customizing or creating your own assessments.

AUTHENTIC PARCC PRACTICE BUILDS STUDENT CONFIDENCE

Measuring Up Live 2.0 assessments are designed to mimic both the form and function of the PARCC assessments. After practicing in an environment that looks like the actual test, students will go into their exam with the confidence they need to focus on the content, rather than the technology of the test.

INSIGHT ASSESSMENT LIBRARY

From the assessment library, educators can save, sort, and organize all pre-created or custom assessments.

When assigning an assessment, you can determine testing windows, activate testing tools, and determine if students will receive instructional feedback.

Provide students with a familiar assessment experience

Students in PARCC and ACT Aspire states will use the PARCC interface, which provides them an authentic experience with the interface and item types that will be on the actual assessments.
GET EVEN MORE ACCESS TO ACTIONABLE DATA

With Measuring Up Live 2.0 analytics, you can access real-time, actionable data to drive standards-based instruction, group students, and connect with families. Clear, concise reporting allows all stakeholders to have a pulse on student performance at the standard, sub-learning, and specific question level.

MEASURE PERFORMANCE

The all-new Growth Report shows results over time in an individual skill category. This report can be created using specific standards, from specific tests.

The Standards Proficiency report shows how a student performed on an entire test, by standard, and by sub-learning objective.

TEST ITEM ANALYSIS

Educators can easily check the difficulty level of each test or item and will be able to understand how each student performs through detailed analysis of their responses.

MY PERSONAL PRESCRIPTIVE PATH® (P³)

From the My Personal Prescriptive Path, your students can review their assessment results, embark on a personalized quest through standards-based MyQuest, or view which Measuring Up worktext lessons will provide additional instruction and practice for that skill.
Teachers have the ability to see how students level up or down within the program. They can also analyze what challenges students may be having by examining their individual responses.

Students are prescribed individualized practice based on their Insight assessment results.

Teachers can assign practice by class, group, or individual student.

When activated by the teacher, students can decide their own standards-based practice.

Students have access to Text-to-Speech and first language support in Spanish.

Within MyQuest, students take ownership of their learning by choosing their mode of practice with Quiz or Game Mode.

Teaching can be a personalized experience.
Measuring Up Live 2.0 provides students with a dashboard that highlights the skills they need to focus on and assignments they need to complete. When students can see their achievements and witness their own success firsthand, they are motivated to take ownership of their personal path to mastery.

SNAPSHOTS TO CAPTIVATE YOUR STUDENTS

**ACHIEVEMENTS**

The achievements panel helps your students track their progress and stay motivated.

**DEEP INSIGHT**

Students stay on track with assessment due dates and get an at-a-glance view of their most recent assessments.

**MYQUEST DATA**

Through MyQuest, your students monitor their own progress, become self-motivated, and continue to challenge themselves.

Measuring Up Live 2.0 provides students with a dashboard that highlights the skills they need to focus on and assignments they need to complete. When students can see their achievements and witness their own success firsthand, they are motivated to take ownership of their personal path to mastery.
Students decide what success looks like!

Providing your students with access to their own performance data and insight into their individual learning goals lets them become active partners in the learning process. Students can create customizable avatars, helping to further personalize learning, build accountability, and in their own unique way personify success.

Through the My Progress tab, students can view the number of standards they’ve mastered, as well as other encouraging results, in real-time.

Students get to personalize their very own avatar within a built-in rewards system. Children have the ability to earn tokens, medals, and badges, receive teacher-generated certificates, and play games in MyQuest.
Measuring Up Live 2.0 is a flexible fit for all core instruction!

Measuring Up Live 2.0 is an online, supplemental program that allows you to track your students' progress towards standards mastery and provide them with an authentic testing experience to practice for their PARCC assessments.

**Measuring Up Live 2.0 can be used for:**
- **Formatative and Summative Assessment**
- **Curriculum-Based Assessments**
- **Ongoing Standards Practice**
- **Before- and After-School Programs**
- **Summer School**
- **Homework**
